Q&A

Q: Does Microsoft 365 Business Premium plus Microsoft Defender Suite allow mixed licensing for endpoint security solutions?

- ▶ A: Microsoft Defender for Business does not support mixed licensing so a tenant with Defender for Business (included in Microsoft 365 Business Premium) along with Defender for Endpoint Plan 2 (included in Microsoft 365 Security) will default to Defender for Business. For example, if you have 80 users licensed for Microsoft 365 Business Premium and you've added Microsoft Defender Suite for 30 of those users, the experience for all users will default to Defender for Business. If you would like to change that to the Defender for Endpoint Plan 2 experience, you should license all users for Defender for Endpoint Plan 2 (either through standalone or Microsoft Defender Suite) and then contact Microsoft Support to request the switch for your tenant. You can learn more [here](#).

Q: Can customers who purchased the E5 Security Suite as an add-on to Microsoft 365 Business Premium transition to the new Defender Suite starting from the October billing cycle?

- ▶ A: Yes. Customers currently using the Microsoft 365 E5 Security add-on with Microsoft 365 Business Premium are eligible to transition to the new Defender Suite beginning with the October billing cycle. For detailed guidance, please refer to the [guidelines here](#).
