

On May 25th 2018, the General Data Protection Regulation will come into force as European law. After this day, all companies that process, collect, register and store personal data, must documented live up to a number of new or tightened up requirements.

The GDPR-Portal is a user-friendly tool for private companies, which helps you comply with the requirements of the General Data Protection Regulation. Here you will find understandable descriptions of the regulation's requirements and help to get an overview of the data processes and tasks your business needs to do. Completed with templates that help you meet the requirements and makes it easy to document everything. Even at an affordable price.

USER-FRIENDLY TOOL TO COMPLY WITH THE GENERAL DATA PROTECTION REGULATION

The GDPR-Portal gives you

- o Easy mapping of workflows, data processors and IT systems
- o Assistance for risk assessment of processing activities
- o Overview of tasks which needs to be solved to comply with the GDPR
- o Simple descriptions of the requirements of the regulation with relevant examples
- o Templates with relevant examples to help you prove that you meet the requirements
- o Module to monitor compliance with policies and procedures
- o Relevant reports, including the statutory list of processing activities

You save resources

The Portal is designed so that the work is easy to structure, and the content makes sure that you need less resources to implement the General Data Protection Regulation.

You get strong documentation

When the supervisory authorities come on control visits, you can just give them access to the Portal and hand out the custom policies, procedures and documentation obtained.

You are always up to date

We continuously update the portal with instructions and decisions from the Data Inspectorate, to have the necessary knowledge to ensure that your procedures and documentation remain sufficient.
