

## Automate e-signature workflows and generate documents in Microsoft Dynamics 365

Create data-driven proposals, quotes, price lists and send them for signing without leaving your Dynamics 365 organization.

### Generate pre-filled documents

SignNow allows you to automatically create branded quotes and business proposals pre-filled with Microsoft Dynamics data.

### Update Microsoft Dynamics data

Automatically update or create Microsoft Dynamics data with submitted data from clients using data-driven fillable forms.

### Close more deals in less time

With SignNow, you can e-sign an agreement while on the go and send it back to your partners in seconds.

### Speed up approval processes

Close deals faster by sending contracts for signing to multiple recipients on any smartphone or desktop computer without leaving your Microsoft Dynamics account.

### Check the status of documents in real time

Monitor changes in agreements and contracts in your Microsoft Dynamics account. Verify who signed your document and when.

### Protect access to your documents

Ensure that a specific recipient is the only person capable of signing and filling your document by adding a password.

## Integrate a complete e-signature solution into your Microsoft Dynamics ecosystem

Avoid costly errors by generating pre-filled documents

Share documents for signing via email or a signing link

Set the order of signing and assign a role to each signer

Save time generating documents with SignNow templates

Get instant document status updates

Save complete document histories to your computer or cloud storage

Get started today and see why thousands of customers prefer SignNow for its ease of use when sending, signing, and storing documents safely and securely.
